## REBEKAHS HOLD SPECIAL MEETING

On Nov. 8th the Rebekahs held a special meeting, which was attended by Sis. Goodman, president of the Rebekah Assembly, and several members from Bowden.

Sister Lilley, D.D.P.O., presided over a very successful district meeting and was commended on the arrangement of such an educational program.

Sister Mae Fox, P.G., gave an interesting resume of her visit to the sessions of the A.R.A. held in Columbus, Ohio, in September.

During the afternoon six members of Justice Lodge No. 62 were presented with jewels for having attained high honor in their lodge distinction. Sisters Goodman and Mae Fox presented these jewels in a pleasing manner to Sister E. Lilley, Nell Jones, Nettie Fox, Mrs. Ballam, M. Wigle and Violet Hart.

The meeting concluded with the solo "Friendship, Love and Truth," rendered by Sis. Pigott of Bowden.

After the meeting 32 members partook of a turkey banquet at the White Lunch.

Taking advantage of the fine weather, good progress is being made at the Curling Rink this week. It is expected that if the volunteer workers come as good as they are coming, the roof should be on by the end of the week.

Quite a number of Crossfield residents attended the funeral of the late "Bunk" Coffin in Calgary on Saturday last. The pall-bearers were all local friends and neighbors of the family.

## 68% Current Taxes Paid in Municipality

At the meeting of the Council of the Municipal District of Mountain View, held on Thursday, November 7, all councilors were present with the exception of J. J. Niddrie.

Secretary-treasurer Brusso reported that out of the 33 parcels appealed to the Alberta Assessment Commission on Nov. 1 and 2, slight reductions were made on 10 parcels.

Reports were submitted on the meetings of the Municipal District Association held at Red Deer and Calgary.

A claim was received for damages caused to a truck which broke through a sewer after some discussion was initiated by council.

A communication from the Department of Public Works authorizing a special grant of \$200 towards graveling on the road west of 144, 23, 26 and 35 in township 30-9-4. Another grant of \$300 was authorized for the graveling of the road between 32 and 33-28-1-5 and east and north of 36-28-5.

One complaint was dealt with in connection with weeds on the west of 14-28-3-5.

(Continued on back page)

Bethune Ann Scott of Ottawa, who has been awarded the Lou E. Marsh Memorial Trophy for outstanding performances as a figure skater, has other activities to keep her busy such as horse riding and skating. She is shown here with her mother leaving the "Building" on Capital Hill.

## MOSCAL NEWS

\* \* \* \* \*

Mrs. Goodman of Ponoka was the guest of Mr. and Mrs. Charles Fox during their stay at Crossfield.

Mr. and Mrs. R. Young have moved to Drumheller where Dick has accepted a position.

Don't forget the Picture Show in the U.F.A. Hall on Saturday evening.

Mrs. Kent and children of Edmonton are spending a few days at the home of her parents, Mr. and Mrs. A. W. Gordon.

The new hardware clerk in the U.F.A. store is Mr. R. Moore of Calgary and we welcome him to our community.

The Box Social and Card Party announced to be held at the Elba school on Nov. 22 has been postponed one week and will now be held on Friday Nov. 29.

The second meeting of the Medina Club will be held at the farm of A. H. Walsh on Saturday Dec. 14. Acting Secretary David King invites everyone who would be interested to attend.

Mr. and Mrs. Charles E. Duggan and Mr. and Mrs. Larson motored to Calgary on Wednesday to attend a surprise party for Mrs. Duggan's father, Mr. Bill Noonan, who was 78 years of age. He is in excellent health, riding his bicycle to work every day. He is well known in the Crossfield district.

On Friday evening Mr. and Mrs. Charles Fox entertained at a card party at their home in honor of Mrs. Goodman, president of the Rebekah assembly.

Eight tables of court whilst were in play, prizes being won by Mrs. A. Aldred and Mrs. E. Lilley, Nell Jones and Charles Whittaker. The hostess assisted by several members of Justice Lodge served delicious refreshments, which brought to a close a happy social evening.

## OBITUARY

### FRED BUDGEON

Fred Henry Budgeon, 73, of 216 12th Ave. N.E., died Sunday in a Calgary hospital. Rev. T. E. Martin will conduct services in Jacques' chapel Wednesday at 2:45 p.m. Interment will follow in the family plot, Union Cemetery.

Mr. Budgeon was born in Guelph, Ont., and came to the Morley district in 1896. In 1929 he moved to Castor and lived there until going to Victoria in 1938. He lived there two years, in Crossfield three years and in Didsbury until coming to Calgary in 1943.

He is survived by his widow, Jessie, Calgary; a son, Ralph, Crossfield; a daughter Mrs. C. V. Peel, Calgary and three grandchildren.

## HOME AND SCHOOL ASSOCIATION

At a meeting of the officers of the Home and School Association, held on Friday last at the home of the secretary, Mrs. Jean Stevens, the agenda was drawn up for the next meeting, to be held this Thursday. It was decided to recommend that members be asked to subscribe 50 cents as a membership fee, and an additional 10 cents for affiliation to the parent union.

It was also the opinion of those present that the serving of a bowl of hot soup should be started about December 1, to all country children who are obliged to bring their noon-day lunches.

It was decided to make refreshments at the next meeting of the Association as a part of the programme.

Some discussion took place as to the best means of raising funds to purchase soup, utensils, etc., and Mrs. C. D. Casey kindly offered to donate a turkey to be raised and sold to the members for the purpose of this purpose.

At the close of the meeting Mrs. Stevens served a dainty lunch. A full report of the general meeting will be given in our next issue.

## OBITUARY ORA COFFIN

Mr. Cyril Hutchins conducted services at the cemetery afternoon in Jacque's chapel on Old Edgar Court, 61, 120 16th Ave. N.W. Interment followed in Union cemetery. Pallbearers were J. Aldred, C. Aldred, W. W. Stafford, G. Almough and A. W. Gordon.

## CHURCH SERVICES •

### UNITED CHURCH

Services this week

Rev. J. V. Howey

Crossfield S. S. at 11:00 a.m.

Evening service at 7:30 p.m.

## CHURCH OF THE ASCENSION

Rev. J. M. Roe

Service Sunday Nov. 17, 1946

Evening at 7:30 p.m.

## CROSSFIELD BAPTIST CHURCH

## The Nuernberg Trials

**IN A WORLD WHICH HAS GROWN** accustomed to events of immense importance following each other in quick succession, it is difficult at times to evaluate what is happening in terms of its effect on the future well-being of the world. The Nuernberg war trials have now been ended for some time and other news has succeeded the accounts which for many weeks appeared in the press, telling of the grim proceedings dealing with the accused leaders of Nazi Germany in the late war. It would be well, however, for the trials to be always remembered, for they marked a milestone in the course of human history, and there have been few events so filled with importance for this and succeeding generations as the dealing out of justice to those men who plotted together to bring misery and destruction to millions of innocent people.

**Not Planned For Revenge** Although there are undoubtedly many who would feel that the sentences imposed were fitting retribution for the crimes which the Nazi criminals had perpetrated, it was clearly indicated that revenge was not the motive of the trials nor did it influence the outcome. Justice for the first time in history, these men were tried in an impartial court with all the rights of prisoners in any free country, for their fiendish crimes against humanity. If the Nuernberg trials have the effect which it is hoped they will, statesmen in the future will be aware that they cannot bring peril upon peoples and nations at will without some day being liable to be called to account for their actions at a court such as was conducted at Nuernberg.

**Excuses Were Not Accepted** The excuse put forth by the Nazi defendants in these trials, and by other war criminals before them, namely that they were the tools of others, in higher positions, was not accepted. In refusing it, the court at Nuernberg established a precedent which should in the future deter statesmen and others in authority from instigating crimes such as were committed in Europe between 1939 and the defeat of Germany. During that time, millions of people were subjected to the cruelties of Nazi rule, and the acts of sadism, terrorism, and violation of humanity and cruelty, such as the almost incredible treatment dealt to the people of the village of Lidice. It is unthinkable that the world should again witness such horrors, and it is to be sincerely hoped that the lesson of the Nuernberg war tribunal will be well remembered, and will be instrumental in preventing any repetition of violation of human rights such as have occurred during the last decade.

### Outlook Better

Population Growth Prospects For Canada More Favorable Than U.S.

**NEW YORK.**—The outlook for continued population growth in Canada is far brighter for Canada than for the United States; Metropolitan Life Insurance Company statistics show.

Based on birth records of the two countries, the statistics indicate that in the years 1946-1948 Canada's population grew at the rate of 27 per cent per generation while the United States rate was just a little more than requirements for a stationary population.

### No UNEMPLOYMENT FORESEEN IN UNITED KINGDOM

**LONDON.**—Supply Minister John Wilmot stated that unless the British government "made some terrible mistake," there would be no unemployment in this generation, such as that experienced during the First and Second Great Wars.

M. Wilmot, addressing an audience in his home constituency of Deptford, in southeast London, said that Britain was entering a period in which only health to consumption was produced. He added that the more Britain could produce, the more she could have.

He said the answer to the problem of shortages was to increase output.

### ONE ON POSTMASTER

The street in Chattanooga, Tenn., was rather dark as Postmaster Robert Sterchi deposited his large package, very properly addressed for mailing, in the container. As he turned, a stranger tapped him on the shoulder and explained: "Sir, that's the garbage can. The mail box is over here."

**ITCH CHECKED**  
in a Jiffy  
or Money Back

## Price Control And Rationing Information

Q.—Will I be changing the address of my place of business shortly? Should I notify the Licensing Division of the War-time Prices and Trade Board?

A.—Notification of any change in address, name, ownership or character of business must be submitted to the Director of Licensing through the nearest office of the War-time Prices and Trade Board, within ten days after discontinuance of business for other than seasonal reasons.

Q.—Will you please tell me when the canning sugar coupons expire?

A.—No expiry date for canning sugar coupons has been announced. Before any change is made, you must be assured that plenty of notice will be given through the press and over the air.

Q.—Are suits still held for discharged army service personnel who are in possession of priority certificates?

A.—After October 30 no more priority suit certificates will be issued to discharged servicemen. Certificates which are not yet issued, will remain valid until December 31.

Q.—Have California dates been removed from the calendar?

A.—The War-time Prices and Trade Board has removed California dates from price control.

### For Safe Driving

**Clear Vision And Proper Care Goes Far To Prevent Accidents**

About now is the proper time for motorists to consider safe driving in bad weather. Lives are at stake from indifference, carelessness and wanton neglect. The importance of a clear vision and proper care cannot be emphasized enough.

Please send your questions or comments to the editor of the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest War-time Prices and Trade Board office in your province.

Every Precaution Is Taken And Veteran Engineers Share Driving Job

The Manchester Guardian says the King and Queen to London for the opening of the "British Can Make More" exhibition, travelled by rail to Springburn, 70 miles away. But a European University geology professor thinks evaporation, caused by abnormally dry weather, is the real explanation of the lake's disappearance.

Two other "mysteries" on Queenland's Atherton Tableland are Lakes Barrine and Eacham. Though these two lakes are 3,000 feet above sea level and separated by a distance of 15 miles when she travelled, even her arrangement by which she could signal for a reduction of speed or a stop.

In her day it cost something in the region of £1,000 to make the double journey by royal train from London to Edinburgh. It is said that Queen Victoria once spent £10,000 a year on railway travel.

The King pays first-class fares for every member of the royal party travelling, and before the rise in prices he paid 13s. 4d. a mile for a second-class ticket which he would have to pay more today!

Great precautions are taken and elaborate arrangements made whenever royalty travels by train. Level crossings, gates, level crossings, signals in sidings are examined, and the royal train is signalled mile by mile. No one man has the privilege of driving the train, the honor being shared by a number of veteran drivers.

Answer To Last Week's Puzzle

## LESS LIVESTOCK

Survey Shows A Decrease In All Classes

According to the survey of the principal classes of livestock on Canadian farms as of January 1, 1946, a decrease in numbers was recorded in all classes—horses, cattle, sheep, and hogs—compared with 1945, as follows:

Horses, 2,396,850 in 1946, a decrease of 187,900 since 1945. Milk cows, 3,012,000 in 1946, a decrease of 84,800 compared with the numbers at the corresponding date in the previous year. Cattle (including milk cows), 10,385,000 in 1946, a decline of 37,400 since 1945. Sheep, same, 3,376,400 in 1946, a drop of 243,400. Hogs, 5,377,200 in 1946, a decrease of 648,000.

The decline of horses on farms occurred principally in the Prairie Provinces. In regard to sheep, only Province of Saskatchewan shows a gain over 1945, the number in Saskatchewan where a slight increase is recorded (518,400 head as against 513,200 in 1945). The all-over reduction in numbers of sheep for Canada was 243,400 or 6.7 per cent.

The decline of horses on farms occurred principally in the Prairie Provinces. In regard to sheep, only Province of Saskatchewan shows a gain over 1945, the number in Saskatchewan where a slight increase is recorded (518,400 head as against 513,200 in 1945). The all-over reduction in numbers of sheep for Canada was 243,400 or 6.7 per cent.

## Lake That Vanished

Shee of Water Five Miles Across Disappeared In Australia

The mystery of the "lake that disappeared" has Queensland, Australia, scientists puzzled—and disputing. Which of the theories advanced is correct will never be known, but these are the theories.

Lake Nooga Nooga, situated in Carnarvon station—north of the Carnarvon Range in Queensland, was a considerable body of water. At its widest part it was about five miles across and surrounded by a muddle of mud about 100 yards deep. Since the explosion, there has been no life in the lake.

Residents in the locality believe the Christmas Eve explosion opened a crack in the underground shale layer, which is thought to run from Springsure, 70 miles away. But a European University geology professor thinks evaporation, caused by abnormally dry weather, is the real explanation of the lake's disappearance.

Two other "mysteries" on Queenland's Atherton Tableland are Lakes Barrine and Eacham. Though these two lakes are 3,000 feet above sea level and separated by a distance of 15 miles when she travelled, even her arrangement by which she could signal for a reduction of speed or a stop.

The King pays first-class fares for every member of the royal party travelling, and before the rise in prices he paid 13s. 4d. a mile for a second-class ticket which he would have to pay more today!

Great precautions are taken and elaborate arrangements made whenever royalty travels by train. Level crossings, gates, level crossings, signals in sidings are examined, and the royal train is signalled mile by mile. No one man has the privilege of driving the train, the honor being shared by a number of veteran drivers.

## MAY BE RIGHT

Starting and perhaps not so funny as the answer to this examination question:

"What is the significance of the elements of November, 1918?"

One observer of the class responded: "That's the day the Armistice of World War I was signed and there have been two minutes of peace each year since."—Christian Science Monitor.

"I don't! That's the case of tea," says Murgatroyd, the donkey-faced spokesman for that Grape-Nuts flakes.

"Son, you'll be able to wrestle a walrus or a grizzly bear if you eat Grape-Nuts. They're packed with energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; and other food essentials."

"I'm going to fill up the sled with downy packages of Grape-Nuts flakes next time we're down at the trading post!"

## GEMS OF THOUGHT

### STABLE CIVILIZATION

Who shall introduce into public affairs the principles of primitive Christianity? Will change the face of the world.—Benjamin Franklin.

All that is best in the civilization of today, is the fruit of Christ's appearance among men.—Daniel Webster.

The true test of civilization is, not the census, nor the size of cities, nor the crops, but the kind of man that the country turns out.—Emerson.

I believe in my heart that which binds together my species, which divides us from the rest of creation, is the cause of Christian civilization.—King George VI of England.

If we would reach a stable civilization, we must penetrate below political and economic troubles into their causes and bring about a fundamental change in the bases of life.—Arthur H. Compton.

God-governed, in proportion as God's government becomes apparent, the Golden Rule utilized, and the rights of man and the liberty of conscience held sacred.—Mary Baker Eddy.

## ONLY TWO COURSES

**NEW DELHI.**—With immediate effect only two courses can be served in Delhi restaurants instead of three courses as hitherto. This is the latest attempt by the central government to combat the Indian famine menace.

## Supply Still Short

But Situation Regarding Pure Black And White Pepper Is Improving

The shortage of pure black and white pepper has lasted another six or nine months. W. F. MacLachman, secretary-treasurer of the Canadian Spice Association, estimated.

All that is best in the civilization of today, is the fruit of Christ's appearance among men.—Daniel Webster.

The shortage of pure black and white pepper is improving since the Japanese overran the producing countries in the Far East. Mr. MacLachman said still more had been taken to reorganize production and the situation was improving gradually.

## NEED OF COD LIVER OIL

Parents are reminded by the Department of National Health and Welfare, Ottawa, that this is the best way to keep children healthy.

One of the best ways to keep children healthy is to give them cod liver oil. Cod liver oil is good for the eyes, skin, hair, teeth, bones, and muscles.

Cod liver oil is good for the eyes, skin, hair, teeth, bones, and muscles.

Cod liver oil is good for the eyes, skin, hair, teeth, bones, and muscles.

# THE CANADIAN CUSTOMS DEPARTMENT HAS CLARIFIED ALASKA HIGHWAY RULING

OTTAWA.—Customs department officials reiterated a statement that commercial goods are not allowed to move from the United States to Alaska over the Alaska highway unless duty is paid.

The subject came up earlier last week when Senator Warren G. Magnuson, chairman of the Senate American state department that American shipments were being barred on the highway. He said this was contrary to a United States-Canadian treaty but external authorities at Ottawa said there was no treaty. They said no shipments were under way with the United States in an effort to work out an arrangement for shipments.

Under the present regulations, customs department officials said, there is no provision for shipment of goods by truck from Canada.

The Ottawa outline of the situation conflicted to some extent with a statement made in Edmonton by W. J. Evelyn, administrator of the Canadian section of the highway. Mr. Evelyn said no shipments had to be referred with the customs and excise branch in Ottawa and then they were allowed to move.

Customs officials said there was no arrangement for any such clearance.

Mr. Evelyn also referred to three shipments being made recently and said "we expect that these might have been shipments of personal or household goods which are not subject to duty."

"The only way commercial goods can enter Canada and move over the highway is for duty to be paid on them," Mr. Evelyn said Saturday. "Shipments of commercial goods in bond by truck is not permitted anywhere in Canada."

## JUST WEATHER CHECK

BREST, France.—Speculation that a container dropped by parachute in the Brittany area may have had some connection with the recent news of jewels belonging to the Duke and Duchess of Windsor ended abruptly. The French meteorological bureau announced that it owned the container, dropped as part of a routine weather check.

Most of the birds that migrate to and from Canada travel at night.

# SUMNER WELLES SAYS UNITED NATIONS' SECURITY COUNCIL SAVED WORLD FROM ANARCHY

MONTREAL.—Existence of the United Nations, during the critical post-war period, has had the effect of "saving humanity from world anarchy," Sumner Welles, former undersecretary of state for the United States, said here.

The fact that the security council of the United Nations existed, and that its authority was recognized by practice, made it possible for such grave disputes as those involved in the case of Iran, Spain and Greece either to be solved or at least to be led into channels where a just and permanent solution could still be found, he said.

"The United Nations must be strengthened and improved but this must be done on practical grounds rather than by advocating the immediate formation of a system of world government."

Russia has already expressed her opposition to world government, Mr. Welles recalled, and the United States would likely feel reluctant to support it.

Establishment of a just peace would likely be resisted if the lesser powers among the United Nations were afforded a far greater opportunity of shaping the decisions reached than that they had yet been accorded.

"A majority of the lesser powers have had no initial axe to grind. They are motivated mainly by an overwhelming desire to see the conclusion of a peace that can last."

The compromise at the peace conference at Paris on Trieste, Italian colonies, freedom of navigation on the Danube, the frontier between Italy and Yugoslavia and other issues could not make for the establishment of any lasting peace, he said.

"These treaties represent only the lesser part of the peace-making problem. If the peace treaties with Russia and Japan are to prove to be of the same nature as those now adopted, the results will necessarily be even more dangerous."

Referring to factors contributing to the mutual distrust of Russia and the western democracies, he said that what is required today is the persistence and patience on the part of the proponents of the peace and those fair solutions for the practical problems which are keeping us apart.

## SURE OF SUCCESS

Russia's Foreign Minister Confident United Nations Will Overcome

NEW YORK.—V. M. Molotov, Russian foreign minister, said he "was sure that the arguments of the United Nations will be settled and difficulties overcome in the interest of peace."

Mr. Molotov, smiling genially, and speaking through an interpreter, told the press in an interview aboard the Queen Elizabeth that "the delegation for the Soviet Union will work for the interests of peace because this represents their ideals, too."

The Russian foreign minister was accompanied by Andrei A. Gromyko, delegate to the United Nations and Andrei Y. Vishinsky, Russia's deputy foreign minister. Both Gromyko and Vishinsky, although they smiled broadly, refused to make any statement for the press.

## RENTAL INCREASE

General Lifting Of Ceilings Is Seen During 1947

OTTAWA.—A general "across the board" increase in rental ceilings is expected, according to some persons in 1947, following by a similar move by the research division of the prices board, according to information obtained here. Regional controllers will still continue to deal with specific cases, but the research study indicates that wage and price increases will be higher than in previous years, due to a general raise in rental ceilings.

A researcher of the division is now in Washington, making a study of the U.S. rental situation. According to the information, the Canadian study indicates that during most of 1947, the general rental rise should not exceed 10 per cent.

## PLANS FOURTH REICH

NUERNBERG.—Rudolf Hess has taken over the Nazi party's role since Hermann Goering's suicide, is showing a keen memory, and is drafting a plan for a "Fourth Reich." Col. Burton C. Andrus, prison commander at Hess was in good humor despite his life prison term. During the trial he acted in an eccentric manner but was ruled legally sane.

SAKURATON—Dr. W. P. Thompson, dean of arts and science, University of Saskatchewan, has been appointed a member of the national research council, it was learned.

The appointment is for a period of three years, expiring March 31, 1949.

The appointment brings to two the number of Saskatchewaners on the council.

J. MacKenzie, former dean of engineering at the university, is president of the council.

## WILL NEED WHEAT

Contract With Canada Does Not Fill Requirements of Britain

EDMONTON.—Sir Alexander Clutterbuck, United Kingdom high commissioner to Canada, in an interview, said Britain's wheat requirements this year and again in 1948 will be about 220,000,000 bushels a year, or 50,000,000 more each year than is provided for under the Canadian contract.

In regard to the Canadian wheat contract providing for a minimum of 160,000,000 bushels a year, Sir Alexander said Canada's wheat would need more than this amount for home consumption. Not only had she to take care of its home demands, but supplies also had to be furnished for the European occupation zone in Germany.

Britain, he said, had done much better than had been expected in making trade recovery in the first post-war year, and there was every reason for confidence that the country would "break even next year." The pressure of British public opinion, which has reacted strongly against the acquisition of these dependencies by the war crimes tribunal. In consequence, it was felt when exports were sufficiently high to pay for the goods which the country imported.

## MORE FOR EXPORT

Restrictions Have Been Lifted On

Another Saskatchewan Man Made Member Of National Research Council

SASKATOON.—Dr. W. P. Thompson, dean of arts and science, University of Saskatchewan, has been appointed a member of the national research council, it was learned.

The appointment is for a period of three years, expiring March 31, 1949.

The appointment brings to two the number of Saskatchewaners on the council.

J. MacKenzie, former dean of engineering at the university, is president of the council.

## TO BLAZE TRAIL

SAN FRANCISCO.—A senior step toward trans-Pacific air mail service was made with the take-off of the Pan-American world airways clipper Westward Ho on a 24,000-mile survey flight through the Orient.

SAKURATON—Dr. W. P. Thomp-

son, dean of arts and science, University of Saskatchewan, has been appointed a member of the national research council, it was learned.

The appointment is for a period of three years, expiring March 31, 1949.

The appointment brings to two the number of Saskatchewaners on the council.

J. MacKenzie, former dean of engineering at the university, is president of the council.

## QUEEN STEERED LINER DURING SPEED TRIALS

QUEEN STEERED LINER DURING SPEED TRIALS — Queen Elizabeth is shown on the bridge of the great liner bearing her name during speed trials off the Isle of Arran. After taking a spin with a dummy apparatus, Her Majesty took over the ship's wheel and steered. The Queen Elizabeth is shown steaming off the Isle of Arran during the speed trials.

Princess Elizabeth and Margaret Rose also were aboard.

Production of alfalfa seed in Canada this year was estimated at about 9,000,000 pounds. Domestic requirements will be about 5,500,000 pounds, leaving about 3,500,000 pounds available for export.

## SALES MOUNTING

Canadians Realize That New Savings Bonds Are Good Investment

OTTAWA.—Canadian alfalfa seed export of which has been restricted over the last few years because of the world seed shortage, now may be exported to any country, the agriculture department announced.

Canada's only formally now to be met by Canadian exporters is to have an export permit issued by the export permit branch of the trade department.

Up to now the seeds committee of the International Emergency Food Council, which controlled all exports, had to issue a permit to each country. Thursday, however, the department was advised that alfalfa seed has been removed from the allocation list.

The production of alfalfa seed in Canada this year was estimated at about 9,000,000 pounds. Domestic requirements will be about 5,500,000 pounds, leaving about 3,500,000 pounds available for export.

Reports from Western Canada indicate that in the rural areas many farmers were going straight from grain elevators to the banks and to investment dealer offices, turning in a substantial portion of their harvest cheques for the new bonds.

The party is due to reach Sydney on Nov. 18. It will mark the first time an American Davis cup team has flown to the site of a title match.

OTTAWA.—Recruiting for both the active and reserve forces of the post-war Canadian army is "proceeding steadily," defence headquarters announced, but there are still 10,000 vacancies in the active force and an undisclosed number in the reserve force.

The active force, when up to strength, will number 25,000 officers and men, while a reserve strength of 300,000 is planned.

Headquarters said both forces are "swinging into action to recruit up to full strength as soon as possible" and that recent approval of the new rates of pay, terms of service and the revised pension scheme had opened the way for a full-scale recruitment drive.

Military districts across Canada now are being given instructions to start filling their assigned quotas by enlisting volunteers from either veterans or non-veterans who have had no previous military training.

Since the number of additional recruits required for the active force is not large, it is not intended to open recruiting offices, but information on how many men will be available to prospective recruits on application to any army unit—reserve or active—in Canada.

## AFTER DAVIS CUP

American Team Flying To Australia To Compete For Tennis Trophy

NEW YORK.—The American Davis cup team will leave San Francisco Nov. 15 by Pan-American Airways for Australia, where the challenge round for the international tennis trophy will be played the last week in December. Walter Peter, non-playing American, will accompany the team.

The party is due to reach Sydney on Nov. 18. It will mark the first time an American Davis cup team has flown to the site of a title match.

# SOVIET RUSSIA REDUCES ARMED FORCES FOR FOURTH TIME SINCE END OF WAR

## LUMBER SHIPMENTS

United Kingdom Received More From British Columbia In August

VANCOUVER.—Shipments of lumber from British Columbia to the United Kingdom totalled 48,246,000 board feet in August this year compared with 48,000,000 board feet in July, according to the Pacific lumber inspection bureau announced.

Total B.C. coast production of lumber during August was 120,000,000 board feet and 6,804,000 board feet went to Australia; 3,645,000 board feet to China and 6,814,000 board feet to Africa.

The decree said "older ages of soldiers and non-commissioned officers of the armed forces will be sent home from the army during the period from Nov. 1 to Jan. 1. It did not say what age groups were going back to civilian life. It does not affect officers or men of the air force or navy."

Until now Russian demobilization orders have limited age groups.

There has hardly been a period, however, since the first of the four demobilization orders and now that men have not been leaving the army.

In view of the greatly reduced expenditure for defence, observers believe that this is not the last such order.

Although the latest order came on the day of the meeting of the United Nations' general assembly, observers believed that may have been only a coincidental indication of demobilization to follow by an overall pattern of getting men back into the thousands of jobs when they are desperately needed.

## LAUNCHING DRIVE

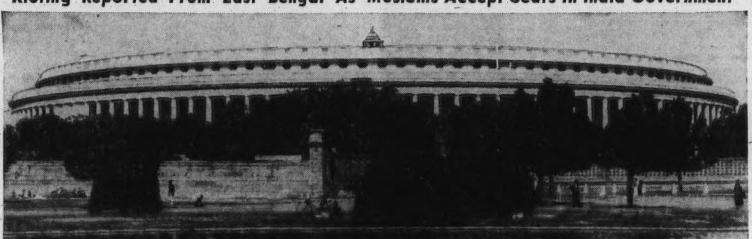

Aim Of Royal Canadian Mounted Police Is 1,000 Recruits

OTTAWA.—Sgt. W. H. Wood of the Royal Canadian Mounted police announced recently the extra war duties' pay, drawn by members of the force since 1944, has pay rates, effective Oct. 1.

At the same time Commissioner Wood announced the force was launching a drive for 1,000 recruits and added that as a further inducement the age limit has been temporarily reduced from 21 to 18 years.

**CHANGE FOR RENTERS**

MONTREAL.—R. K. Bolton, head of Wartime Housing limited, said in an interview that consideration is being given by the government to the question of selling to former servicemen and their widows the houses they rent at present from Wartime Housing.

Rioting reported from East Bengal as Moslems accept seats in India Government

New offer by Viceroy Wavell for the Moslem League to enter the interim government is said to have been accepted. Pandit Nehru, above, is leader of the interim government.

Works, mines and power minister is Sarat Chandra Bose of Hindoo Congress.

Leader of Indian Christians, which has one seat in cabinet, is Sir Raja Singh.

## SECOND DESTROYER COMMISSIONED FOR CANADIAN NAVY

Nootka Built At Halifax Joins Tribal Class Of Athabaskan And Cayuga

Her two-month program of preliminary training completed, Canada's most recently commissioned warship, the Tribal class destroyer, H.M.C.S. Nootka, has joined the fleet.

Nootka is the second Canadian-built destroyer to have been made ready for sea since the war ended. A sister ship, H.M.C.S. Micmac, was commissioned on September 12, 1945, and has been operating with the fleet since October. Two other Tribal class destroyers, Athabaskan and Cayuga, are under construction at Halifax.

Commissioned at Halifax on August 7, 1946, Nootka, commanded by Commander S. Bauer, D.S.C., in the R.C.N. Like other warships of her class, she displaces about 2,000 tons, has a rated speed of 35 knots (about 40 land miles an hour) and has as her main armament six 4.7-inch guns, two four-inch guns, and torpedoes.

A fresh coat of paint from stem to stern and from the top of her mast to the waterline was the last step in preparing Nootka for service with the fleet.

Nootka's training or "working up" program was designed to familiarize completely the ship's company with the new ship and its armament.

The training day was a long one, starting at 6 o'clock in the morning and often continuing until late at night when night gunnery and torpedo exercises were being carried out. There was no short leave for members of the crew except for Saturday and Sunday nights when the ship was at port.

During the day the "working up" period, the hours are long and the training is intensive, every effort is made to carry out the work in a "team" spirit and to encourage participation of all hands in ship's company. Each officer and man is expected not only to make himself thoroughly familiar with the part of the ship to which he is assigned, but also to learn how to deal with emergencies.

The ship's company learns how to fight fires, how to shore up damaged bulkheads to keep the ship afloat, how to tow disabled vessels and how to prepare for being towed by their own ship if damaged.

During the evenings ("from 4 p.m. to 8 p.m. civilian time), time is usually found for boat pulling and sailing or competitive sports. If the weather is not suitable for these activities, instructional films may be shown.

On joining the fleet, Nootka, at present under the Commanding Officer, Atlantic Coast, will for operational purposes come under the direction of the Senior Officer Adm. Captain F. H. Evans, R.C.N., commanding officer of Warrier. She will carry out the normal duties of a warship of her class, such as carrying out manoeuvres and other ships of the fleet, carrying our goodwill cruises, joining in the operations of the fleet and the functions of which a modern warship is capable and which may be required for her in the coming months and years.

### "Babies' Hotel"

Mother In Australia Have Solved Problem Of Baby Hotels

Mothers in Melbourne, Australia, have had their "children's parking" problem solved in an ingenious way. A group of enterprising Mothercraft nurses recently established a "Babies' Hotel" which caters for all children under six years. Here mothers book their place for the day while they shop, go to the theatre or keep luncheon appointments. The hotel is a converted 20-room villa in a Melbourne suburb. The children have an acre and a half of ground in which to play and there is a large room for playing. Five nurseries and even an isolate ward.

### WINSTON CHURCHILL RECEIVES WALKING STICK

LONDON.—Winston Churchill received a native walking stick from K. M. Goodenough, southern Rhodesia high commissioner. Mr. Goodenough made the presentation on behalf of native farmers of the Chilimbi district, north of Port Victoria. He explained that the native farmers wished to make a gift to Britain's wartime prime minister because "he was the man who won the war."

### LEARN ALL OVER AGAIN

A superintendent of schools in America visited a night school for adults. He was called upon to congratulate an old woman. She had enrolled at the start of the course with a single, avowed intent—to learn to write her name. She had succeeded, and the course was at an end, and she was leaving.

The next year the superintendent visited the same school. The old woman had enrolled again. "Why?" he asked her.

"I'm going to learn to write my name," she said.

"But you learned that last year."

"I know that. But now—and she swelled with pride—"now I've gone and got married."

## Oxen, Mules, Horses and Tractors Draw Plows At First International Matches Held Since The War

First international plowing match since the war was held at the Fort Garry airfield near Goderich, Ont. Officially opened by the governor-general, Viscount Alexander, the match had the biggest entry in its 33-year history. Here Herbert Carruthers of Eau Claire, Ont., demonstrates with oxen and wooden beam plow.

William Johnson, 92, of Ashfield, Ont., still does a good day's work about his farm. He plowed his first furrow in the year before confederation as a lad of 12, using oxen.

### Worth A Trial

#### Attitude Of Parents Might Help Keep Young People On Farms

The Owen Sound Sun-Times says:

For many years now, the attitude of farm boys and girls is to leave the soil and seek their livelihood in the towns and cities. This has caused great concern both among the farmers themselves and among the authorities of the Department of Agriculture. It is one of the great problems of the agricultural industry. With more labor, many farms could be made to produce much more and brought into a much improved economic condition.

There can be no better farm labor than the boys and girls, who have been born and raised on the farm. These are many little tricks of the trade which are acquired during youth and which are difficult for a city boy to learn.

The farm, if presented in the proper light, should have a real appeal to the sons and daughters of the farmers. The feeling of pride in the land should be a natural thing to the great majority of the larger disadvantages could be overcome.

One important phase of the situation rests with the farmers themselves. Do they all in their power make it attractive to the young people? Do they give their sons and daughters a share in the produce in relation to their share in the work of producing it? Does the fact that the son or daughter care for such a duty grow up to become the father's cow, the pig he must feed, the grain he must store, the grain a part of the father's bank account without any thought of remuneration to the young people? Are the young people consulted in regard to the running of the farm operations? Or are they, as unfortunately is too often the case, just taken for granted, doled out a little cash any time they happen to be taken to town, and more or less ignored in all planning and expected to do what they are told because it is father's farm?

Naturally short hours and big pay are a big attraction toward the towns and cities. But there is something else that can be done to do more to offset these attractions if the life is made as pleasant as it may be. There are many born with that natural love for the soil which will overlook much of the toll which goes with farm labor.

Many farm parents are very thoughtful in this regard, with a considerable improvement in recent years. Many, on the other hand, possibly largely due to thoughtlessness, are not.

#### UNDER-NOURISHMENT

Many common ailments are due to under-nutrition, declares a food authority of the Department of National Health and Welfare, Ottawa. "Too often," says the expert, "illness is not due to something which should have been, but was not included in the diet at all. Of such ailments are headache, stomach-ache and fatigue." Nutrition authorities say that such healthful foods as milk, meat, vegetables and meat or meat alternates are essential to the daily diet.

#### HANDLE CAREFULLY

Never force a side fastener—open and close carefully, using the tail. Before laundering, ironing, or fastening completely, otherwise iron may hit and force teeth out of alignment.

#### WELL PRESERVED CAKE

HIGHWOOD, Ont.—When Mrs. A. Danny's baby was baptized in 1928 some of the christening cake was put in a tin and sealed. Opened in 1946 at her confirmation, the cake was in excellent condition.

### Painted War Pictures

#### Work Of Late C. R. Nevinson, British Artist, Was Outstanding

The late British artist, C. R. Nevinson, died on May 19, 1946, at the listed British soldier in Flanders. As a private and a motor mechanic he took part in the war until his health broke down and he was discharged from the Army. He was described by Major Gen. H. H. Vane, as some painting during his convalescence, paintings of soldiers in the war, some heroic, some shell-shocked, all realistic. He put on a show of his paintings in 1916 and his exhibition caused quite a stir. The Army War Office conceived the idea of sending official artists to the front. Mr. Nevinson and hundred others were selected for this task in 1917. His powerful realistic war paintings won him an unusual reputation as an artist. His work was purchased by the Imperial War Museum and five by the Canadian War Memorial Fund, Ottawa. When Britain again became involved in a struggle with Germany, Mr. Nevinson again painted war pictures. In 1941 his "Fire of London" was purchased by the British Government. When Canadian, British and American Commandos raided Dieppe, France, in 1942, he was also a painter. Both that he served as a stretcher-bearer in many air raids. His painting "The Battlefields of Britain" was chosen to hang in the Air Ministry Building in 1942.

#### Awaits Unveiling

Monument To Marconi Erected On Historic Spot Seven Years Ago

ST. JOHN'S, Nfld.—A monument to Guglielmo Marconi, marking the spot where the Italian inventor received the first transatlantic wireless message in history, stands here for seven years awaiting unveiling.

The monument was erected in 1939 but the official unveiling never took place because the world was too busy with war. It has stood, shrouded in silence, on St. John's Citadel Hill, a ghostly sentinel overlooking the harbor mouth.

It stands nine feet high and was a gift of the Canadian Marconi Company to the people of Newfoundland to commemorate the outstanding event in the island's history and a new era in world communications.

To Feel Right—Eat Right!

### Can Be Harmful

#### But Many People Follow Advice Given By Food Faddists

Food faddists are looked upon by amusement, but they actually can have a harmful influence, says Dr. W. W. Bauer, director of the bureau of health education, American Medical Association. An article in Food Facts, published by the Wheat Flour Institute, Dr. Bauer cites instances of the damage done by food faddists. Many of them are "promoters," have some desire to sell, whether a special food product, a diet or a series of lectures. "Inventing" new foods and promoting it through publications and by popularizing it in restaurants is another successful device," he says. "Health food stores in which very ordinary food products which are sold at exorbitant prices, highly scintillating claims and equally imaginative prices, abound, and so do cafeterias devoted to food faddists of one sort or another."

There are also some persons who believe the ridiculous notion that fish and milk are not good dinner companions. Many of the most nutritious fish dinners are prepared with milk, oyster stew being the best example. "Normal persons can eat any reasonable combination of wholesome foods in sensible quantities," says Dr. Bauer.

#### Invisible Protection

#### Plastic Is Now Used To Make Many Textiles Stainless

NEW YORK.—The synthetic that forms the invisible protective in which glass windshields have been put to use by the Monsanto Chemical Company to make stainless table cloths and other similar textiles. The new process has been announced here under a general trademark the basic claim as invisible as glasswindshields. Doodlers can write in ink on one of these cloths and then wipe the ink off with their handkerchiefs and have water drop on them with a dampened cloth. In the case of the lining going into the handkerchief, in this technique it is necessary to treat the handkerchief. Any kind of food stain, the announcement says, cleaves easily.

The yak, beast of burden in Tibet, gets down icy mountain slopes by drawing its hoofs together and sliding, always landing right side up.

### Made For A Purpose

#### Flight Over Polar Wastes Proved Route Could Be Safely Used

The flight of the Faunus Dreamboat to Cairo never was intended to be a stunt, although it could not avoid some of the stunts trapping which nearly every pretentious experiment attempts. There were the usual fanfare, publicity, the pictures, the farewells, the well-wishers, the ceremony, the delivery of a special edition of a Hawaiian newspaper to King Farouk and the proposal that the big 29 circle the pyramids for the benefit of photographers, which became known as "the Faunus Dreamboat." The flight over the polar wastes was whether or not in the light of developments in aviation the arctic wastes still form a great protective wall north of this continent. They found that it did.

As General Cas. A. Spaatz, chief of the Army Air Forces, said, the Dreamboat's achievement "proves the feasibility of a flight across the polar wastes." By properly equipped aircraft, Capt. Col. Collier, Lt. Col. Irving, pilot of the flight, voiced the same thought—that the arctic air, "which is the shortest route to most places, is navigable and that communication can be maintained with ships and shore stations, even when the weather is bad." If the Nazis had not been kept busy countering our own attacks and working on rockets for use against Britain, it would have been comparatively simple for them to have struck at the heart of the continent and to have seized in northern Scandinavia. The Faunus Dreamboat has shown that in planning for future, whatever it may hold, the arctic no longer can be written off as a safe barrier. New York Sun.

#### Rebuilding Aircraft

#### Woman Mechanic Will Assemble German Biplane For American Colonel

The only American woman holding a mechanic's license for both aircraft and motor is assembling a German Bucker "Jungmann" biplane which was brought from Berlin as a trophy. Col. David B. Sherman of Clemson, S.C., Mrs. Joane VanMaltzahn, wife of a United States Navy lieutenant-commander, is putting the former enemy training craft together without any engineering data or help from Sherman. Col. Sherman intends to use it as a sports plane. Alated by six air force mechanics, Col. Sherman first assembled the trainer in Berlin from abandoned German parts. He was attached to the Air Transport Command later and sent the two-seater to Paris. He had it crated and shipped at his own expense to the United States. He believes the Jungmann was the first and last such "war trophy" authorized by U.S. military authorities. Some airway regulations ruled out aircraft, tanks and means with equal ease.

The yak, beast of burden in Tibet, gets down icy mountain slopes by drawing its hoofs together and sliding, always landing right side up.

### SWITZERLAND AGAIN BECOMING HOLIDAY HAVEN FOR TOURISTS

#### Is A Recommended Respite From Gloom and Grief Of Europe

INTERLAKEN, Switzerland.—Switzerland again is the holiday haven of Europe, although the tourist traffic isn't anywhere near the lavish days of pre-war. The Swiss are trying to bring back foreign exchange restrictions in most European countries still make it difficult to get Swiss francs.

A holiday trip to Switzerland is a recommended respite from the gloom and grief of Europe. Here you don't hear rumor and talk of war which prevails in other continental countries.

This is one of Switzerland's greatest tourist attractions, but the Swiss are not afraid to neutralize and dampen the ways of life they don't appreciate the boom.

Switzerland has everything to offer a tourist. Apart from its famed scenery there is abundant food. Food is rationed but once in the country the tourist is given twice as many ration tickets as he needs.

Here is the only place on the continent, apart from neutral Sweden, where you don't win favors from a waiter or a chambermaid by tipping them with cigarettes. Smokes are plentiful.

The front page of La Suisse, one of the leading daily papers, frequently is devoted to sport stories, with big international news relegated to inside pages.

### Ketchup Shortage

#### Fries Cold Speaker Expects It To Continue Through Winter

TORONTO.—What, no ketchup? another plaguing shortage is still in existence but the reason, price board spokesmen say, isn't the lack of tomatoes but the lack of sugar and household salt. Those who have diligently scoured grocery stores for the condiment will keep doing just that during the coming winter and most of next year. The tomatoe situation, though, is not as bad as it was last year because it can be converted to canned tomatoes and tomato juice without recourse to sugar.

#### PLATE BUILDINGS ON ROLLER SKATES FOR PROTECTION

NEW YORK.—A proposed method of putting buildings on roller skates so they can glide in protection against earthquakes was announced recently.

These "skates," a special type of roller bearing assemblies, will allow a building to roll along in any direction to counter the shock of an earthquake, the Ball & Roller Bearing Information Center said.

#### AUCTIONED OFF

The furnishings of a famous estate had been sold for high prices at an auction, and Mr. Brannick, the auctioneer, had to spend a week in his room with a pile of good books and ordered all his meals brought to him. Whenever George, the waiter, took up a meal, he listened politely to some talk of great auction and sometimes a fat tip.

On the third day, a new waiter brought up Mr. Brannick's breakfast. The auctioneer had grown fond of George, and annoyed, he sent for him and demanded to know why he wasn't satisfied with his tips or what "Satisfied" said George. "It's this way, Mr. Brannick. I was telling the other waiters how high you tip and they all got envious so I—well, I auctioned you off."—Capper's Weekly.

There is no soda in soda water—it's carbon dioxide.

Alexander in the Philadelphia Evening Bulletin

# Helpful Suggestions Given On Keeping Farm Machinery Efficient During Idle Periods

**F**EW farm machines are used in Canada more than 20 to 30 days per year, and those which are used over longer periods are most subject to neglect against rust and weathering. With 335 to 345 days out of each 365 in storage, it should be obvious that extra precautions should be taken to prevent deterioration during the idle periods, and thus insure 100 per cent efficiency of essential equipment during the short active periods, says G. N. Denike, Dominion Experimental Station, Swift Current, Sask., where the study of farm machinery is a specialty.

A definite plan should be laid down in the early spring for the winterizing of farm equipment. The winterizing program should start as soon as each implement has finished its season's work; while the weather is still warm enough for washing, cleaning and application of rust preventatives, and while it is still early enough to provide time for a thorough job on every piece of equipment.

The worst enemy of all farm machinery is dust and dirt. Whatever can be done to keep out dirt through cleaning all parts of the machine. Rust and decay thrive best in the hard-to-get-at or neglected parts where dirt, straw, oil or grime abounds and holds moisture.

The efficiency of winterizing depends upon the thoroughness of the work which precedes storage. Necessary and desirable repair or replacement items are easily observed and a list made for early ordering at this time. A definite plan of overhead should be worked out for each machine during the pre-storage cleanup.

Paint should be used freely and frequently on all wood or metal parts exposed to the weather. Bright wearing surfaces should be given a high coat of paint, a good rust preventative. Shutter chains, sprockets and exposed gears should be carefully coated with rust preventative. Enclosed bearings, ball, roller or plain, should be filled with fresh grease to prevent oxidation from keeping in the storage period.

The tractor or stationary engine requires special care before storage. Cleanliness and paints and greases are important, but special attention should be given to the lubrication and cooling systems. All oil oil should be drained from the crankcase and replaced with new, and the cooling system flushed with a cleaner. If the engine is to be stored, it should be run until the oil pressure is adequate strength. Just before shutting the engine or tractor down for the last time, mix up one quart of kerosene and a good breaking-in type of oil on (50-50) and feed rapidly into the engine until the carburetor is shut off the mixture as soon as the last of the mixture has been added. Be sure all doors are open for this operation. This will free all valves, rings and small parts and leave them coated with oil in condition to withstand long storage periods.

Rubber tires on all tractors, implements or trailers should be properly inflated and the weight removed by blocking. Paint all tires with a good rubber tire preservative and never ever allow them to stand in cool, dry and darkened places. A few hours at care at the right time will add months or years to the trouble-free life of your equipment. Expensive storage is not necessary, but cleanliness and a few precautions are essential.

## Life-Saving Packages

**F**ood For Hillmen In Burma Dropped By Royal Air Force

Thousands of hillmen living among the vast jungle-covered mountains of the Northern Frontier of Burma have been fed by aircraft of the R.A.F.

With food stores empty even of seedling rice for planting in the paddy-fields awaiting the monsoon, they looked to the skies for their salvation from famine.

Dakotas and Halifaxs dropped 200 tons of rice and 180 tons of salt in forty days to the Kachin villages in the hills. Now the paddy-fields are planted and soon the rice will be harvested.

## LONDON ZOO PUTS ITS HOUSE IN ORDER

London's world famous zoo in Regent's Park is restocking its collections after damage suffered in the war. Its damage was \$100,000.

Riding With Police Escort Gives Anyone A Real Thrill

The archbishop of Canterbury established himself as a man of distinction by taking his son and wife to ride with a police escort straight through all the red lights.

It is well enough to ride in the cab of a locomotive engine. It is fine to sit in a single-decker at the opening grand march of the circus depicting the splendor of the Sultan's court. But for the nectar without a drop, the rose without a thorn, the trout without a regret, give us a ride with a police escort.—St. Louis Post-Democrat.

Commercial cannery began in the United States in 1859.

## Not Always Needed

### But Ladders In Fraser River Often Give Help To Salmon

Height of water in the Fraser River varies by 50 or 60 feet, according to the seasons of the year. If the water is extremely high the velocity is reduced and the returning salmon get through to their spawning bed without much difficulty. Or, if the volume is very low—as happens occasionally—the fish can leap against the rapids after retarding in the eddies. A salmon can breast surges of eleven miles an hour, but if the speed of the current gets any faster he falls back.

There were all taken into consideration when the International Salmon Commission installed its excellent pair of fish ladders at Hell's Gate. There was consternation in some uninformed quarters recently when a report had it that the ladders were hanging so high as to be out of water. The ladders are not adjustable—they are built of permanent cement and rock and are designed only to help the fish when they need help, which is at most "average" points of the water's depth and volume.

That the fish get through is the one thing that counts. At very high and very low points they don't require ladders; they get along fine with their own propellers.—Vancouver Sun.

## Heart Trouble

### Specialist Believes Relief Can Be Given Through Medicine

CHICAGO.—Dr. William D. Stroud, a heart specialist for more than two decades, believes that medical cardiologists with heart trouble to lead practically normal lives and that some patients can be permitted to smoke and drink.

In the current issue of the journal of the American Medical Association Dr. Stroud, of Philadelphia, said: "I believe that the average patient with a healed coronary occlusion can return to a sedentary occupation part time in about three months..."

"In my feeling that too many such patients are made total invalids unnecessarily."

Dr. Stroud, a director of the American Heart Association, asserts on smoking and drinking:

"Any person who smokes knows whether or not they are sensitive to nicotine. If a man is not sensitive to nicotine, I believe it is perfectly safe for him to smoke."

"Many physicians advise patients with hypertension to smoke, because it may be of benefit to their heart and to their blood vessels."

"I am not in favor of smoking."

"I am in favor of smoking."

## WORLD HAPPENINGS BRIEFLY TOLD

Alfred, Bristol Zoo's gorilla, got an extra head of lettuce as a treat on his 18th birthday.

Contributions totalling £78,000 (\$150,000) have been received from all over the world to restore St. Paul's Cathedral.

Longest submarine telephone cable between Britain and Europe has been laid to Germany since the end of the war. It runs 200 nautical miles.

A special planning mission from Britain will draw up blueprints for new towns in war-devastated north Europe, Britain's youngest colony.

A statue of General Louis Botha, South Africa's first Prime Minister, was unveiled at Cape Town recently by his daughter, Mrs. Marion de Wet.

Machinery from the submarine aircraft factory near Mannheim in southwestern Germany is being sent to Russia as reparations; it was announced.

Butchers in Britain may soon tag professional letters onto their names. An Institute of Meat has been set up with Fellows, Members and Associates.

Princess Elizabeth, an expert hand with a rifle, recently stalked and shot a 12-point stag in the forests surrounding the Scottish Highland home of the brother-in-law of the Queen.

The United Nations announced that members have thus far contributed \$18,695,785.05 to the working capital fund of the UN, representing 74.78 per cent of the total assessment of \$24,998,500.

## Worth Much More

Although Professor Places Value Of Good Farm Wife At \$69,000

The sunrise of the atomic age has not obliterated sheer stark courage. George F. Pond, President of Agricultural Economic at the University of Minnesota, has the bedrock fortitude that enables a David to face a fearsome adversary. He has calculated that a farmer's wife is a good one is worth \$69,000. In the course of his work, Professor Pond asked farm account keepers to tell him how much their wives co-operated in running their farms. It was revealed that those who said the "co-operation of the wife" was the keynote made an average of \$76,700 a year more than the group that reported their wives "did not co-operate extensively." Thus, if a farmer had an investment that would bring him \$2,750 a year, he could buy his wife \$69,000. Therefore, if there's anything in logic, a farm wife is worth that sum.

It seems to us that this is a conservative figure. Without going into the question of how one would determine the value of a city or a suburb wife, \$69,000 is a modest sum for a lady who runs a house, takes care of children, looks after the chickens, heats the milk and bottle-feeds orphan lambs, helps in the garden, makes pie enough so a man can eat his fill, bakes bread, bakes beans every Saturday, and is willing to make home-made biscuits with reasonable frequency. Add to this the fact that she understands that she must ride 10 miles for supper five nights a week, and the professor's arithmetic conclusion is far too low. We would make it flat \$100,000 without quibbling.—New York Times.

## Whitewash Is Sanitary

Should Be Applied To All Winter Quarters Of Farm Animals

Soon the farms and the winter quarters will have to go into winter quarters. If the buildings are clean and sanitary the livestock will be more easily kept in good health and with food which they will eat better or produce more.

It is not a big job to put the buildings in a sanitary condition; whitewashing will do. The surface to be whitewashed should be free of dirt or grease. Just before applying the whitewash dampen the surface so that the wash will not set too quickly. If a sprayer is used, in preference to a brush, be sure to strain the whitewash to remove pieces of chalk or cheesecloth. A good disinfectant whitewash can be made by adding one or two ounces of carbolic acid to each gallon of whitewash.

Good recipes on how to mix whitewash can be obtained by writing to Dominion Department of Agriculture, Ottawa. These recipes include ordinary whitewash, interior whitewash, exterior weatherproof whitewash, simple cold water paint, weatherproof cold water paint, and washable cold water paint.

## A WONDERFUL GIFT

Prime Minister Smith of South Africa presented Britain cash gifts of more than \$1,000,000 (\$4,000,000) as a "national tribute" from the South African people. In a ceremony at 10 Downing street, Prime Minister Attlee said the gifts were "a wonderful symbol of the democratic spirit in which we must go forward to a new and peaceful era."

Ei Azhar at Cairo is the oldest university in the world, founded in 927 A.D.

**IT'S DIFFERENT—SERVED WITH STUFFING** — Your meals will never be victims of monotony if you remember to serve one new dish each day, or to serve an old standby in a brand new way. For instance, stuffings and sauces can add interesting new slants to chops and other common table dishes. Try stuffing pork chops next time you buy them and serve them with fried apple rings for a delicious and timely meat variation. The stuffing adds extra flavor and is one of the simplest of meat cuts. Stuffed chops make a good company dish or Sunday dinner entrée—and you'll be pleased to learn how little fussing is required in the making:

### Baked Chops With Bread Stuffing

4 double thick chops, pork	1 egg
or veal	1 tablespoon water
Salt and pepper	3 cups corn flakes
1 recipe Bran Stuffing	3 tablespoons fat

Salt and pepper. Fill with stuffing and fasten with a toothpick. Season inside with coarse salt. Beat egg slightly and mix with water; roll corn flakes into fine crumbs. Dip chops in egg then in crumbs; repeat. Sprinkle with salt and pepper and brown on both sides in hot fat. Cover and bake in moderate oven (350 deg.) about 45 minutes. Garnish with apple slices which have been sautéed in hot fat. Yield: 4 servings.

### Bran Stuffing

3 cups fine soft bread crumbs	½ teaspoon salt
½ cup bran	½ teaspoon poultry seasoning
1 tablespoon minced onion	½ cup milk or stock

Combine ingredients; mix lightly.

## Try For Walker Cup

### American Golfers To Compete With Britain Next Year For Trophy

**NEW YORK**—Eight top American amateur golfers are going to Britain next year to compete in the biennial United States golf association international trophy—better known as the Walker Cup.

This was disclosed by the U.S.G.A., which announced that the international matches between amateur teams of Britain and the United States would be resumed at St. Andrews, Scotland, May 16 and 17, 1947.

The trophy has remained in Britain since 1938, when the British team scored a smashing victory in the series, defeating the Americans at St. Andrews, seven matches to four, with half a hole.

War broke out in Europe before the nations could get together for their next meeting in the series, scheduled at St. Paul, Minn., in 1940. No Walker Cup matches have been held since.

The custom has been to alternate the matches between Britain and the United States, and since the first three meetings to hold them every second year.

Britain sidestepped a suggestion that the matches be resumed in the mid-1940's, in 1946, saying it was too soon after the war. Younger players and courses in shape and declined an invitation to bring the cup and defend it in this country in 1947.

## Helps On Up-Grade

### New Bicycle 'Designed In Britain' Helps That Stores Energy

The newest design of a bicycle in Britain has a radio in a motor that stores energy going downhill and releases it up-grades. The cyclist's joy in swooping down a steep incline is always slightly marred by the unfortunate tendency of roads to provide a reverse slope immediately. He sees the hill ahead, and his thought is . . . turn the giddy wheel around, Revolves the sad vice versa of things.

Now, however, he can at least take comfort in looking forward to the time when he will free-wheel uphill to the sound of music—a vision he could hitherto only associate with the products of dreams.

Of course, the design may not please everyone. In the future, when members of British cycling clubs gather in their hundreds for a rally, what a stirring clamor will herald the approach—especially if they are not all tuned to the same program!—Christian Science Monitor.

### A MEMORY SYSTEM

Forget each kind of thing you do.

To you, whatever its measure;

Remember praise by others won;

And pass it on with pleasure;

Remember every promise made

And keep it to the letter;

Remember those who lend you aid;

And be a grateful debtor.

Whenever you meet it.

Remember every kindness done

To you, whatever its measure;

Remember praise by others won;

And pass it on with pleasure;

Remember every promise made

And keep it to the letter;

Remember those who lend you aid;

And be a grateful debtor.

## Origin Of Name

**GREAT SLAVE LAKE WAS CALLED AFTER TRIBE OF INDIANS**

Great Slave Lake, a mystifying body of water of a size bigger than Lake Superior, was named, it is said, for a tribe of Indians called Slavies, which roamed in that region. Yellowknife has more points, for it also is named after an Indian tribe, in that it got their name from carrying yellow robes made from copper of the Coppermine river country to the north of Great Slave lake.

At temperatures near absolute zero most metals completely lose their resistance to flow of electrical current.

Spoon-making on an industrial scale has been originated in Italy at the time of the Roman Empire.

"You've made such great strides in medical science, Doctor, that I'm almost ashamed to tell you my name old symptoms."

## PEGGY

"YOU'LL BE ALL RIGHT, PEGGY! JUST STAY HOME AND REST—ON BOWLS, SOUP, AND SO ON. YOU'LL FEEL BETTER IN A WEEK OR SO!"

"OKAY, MR. TILLER! STICK OUT YOUR TONGUE HMM? LET ME HEAR IT FOR THE PINEAPPLES, AND LISTEN TO YOUR HEART...AH!"

## LITTLE SILVER MINE

**United States WAA Discovered  
De-salting Kit Bags Were**

Discovery of what amounted to a little silver mine in war surplus was reported by the United States War Assets Administration.

Milton Hammer, WAA official, said the agency some time ago became interested in surplus interest in desalting equipment, used to make sea water drinkable.

Thereupon he had the kits assayed by the Bureau of Standards and found that five ounces of silver—worth several dollars—could be extracted from each kit. They were sold for as little as five cents each.

Hammer related the "silver rush" story to the House surplus property committee.

Potential purchasers, he said, proceeded in their negotiations with WAA for thousands of the kits on a theory that the agency did not know the silver could be removed.

Not one prospective purchaser told the agency which he believed there were kits," he said. One purchaser said he wanted the kits because of the pretty little bags they were put up in.

Immediately upon the report from the Bureau of Standards, Hammer said he from the 250,000 kits the surplus agency still had on hand.

Now, he said, the WAA has offered the kits to the highest bidders, with a bottom price of \$3.75 each. The government will get at least \$4 for each kit. They cost the government \$20 each. They are being sold on the basis of their silver content.

## Extra Precautions

**HAVE TO BE TAKEN TO KEEP PENICILLIN**

Now that penicillin can be obtained by a hospital or by any doctor qualified to prescribe it for his patient, the most rigorous precautions are taken to keep it without blemish.

Penicillin, which destroys various bacteria, has its own enemies among them. Therefore, to keep them out of action, the chambers where the penicillin is at last made ready have glass-enclosed walls and ceiling and doors where the air which can't escape can't renew to hide in. All who enter the chambers wear sterilized shoes, clothing, hoods, and gloves. Sterile air is pumped in and kept at slight pressure, so that bacteria rarely get in with the workers and ultra-violet rays await them if they do.

At temperatures near absolute zero most metals completely lose their resistance to flow of electrical current.

Spoon-making on an industrial scale has been originated in Italy at the time of the Roman Empire.

## MIght Be Possible

**But Colonizers Of Moon Would Have To Breathe Artificial Air**

In 100 years' time instead of "go west, young man," it may be "go up, young man."

Young young scientists belonging to the British Interplanetary society claim that colonization of the moon is not beyond the bounds of possibility.

They say the most confident sponsorship will reach the moon within the next 20 or 30 years. After that—well, almost anything is possible. But of one thing they are certain: colonization of the moon is not beyond the bounds of possibility.

"It is quite possible to land on the moon," said L. J. Carter, secretary of the society, "but special precautions will be necessary because there is air, no air, and no oxygen."

And there are creators so that when viewed from one side the other side would be below the horizon."

Mr. Carter said there was probably life on the moon—the possibility of life did not discuss the possibility of creatures living on something "other than air" might exist.

Members of the interplanetary society work in their spare time and with their laboratories gain more knowledge of lunar conditions and of the possibility of travel between the planets.

Some scientists have tied down moon travel to a few years hence, but the society is not so optimistic as that.

"Although we can say that research is coming along very rapidly, it may be 20 or 30 years before a spaceship can reach the moon," Mr. Carter said. "Any of our members would willingly risk his life on the first trial trip."

Many members are established scientists.

## MORE FOR EDUCATION

The Moscow radio said that the expenditure for education in the new Russian budget for the fiscal year 1946-47 would be 40,160,000,000 rubles (\$6,032,000,000), an increase of 13,792,000,000 rubles (\$2,758,000,000) over the preceding year.

## ANY RUPEES IN YOUR PURSE? -

When you buy imported goods in Canadian stores, you pay in Canadian dollars—but the people who made them were paid in Indian rupees, British pounds, French francs . . .

It is the same in reverse with exports. You may be one of the three out of every eight Canadians who make their living through goods sold abroad. If so, you receive your wages in dollars, but your products are sold in all sorts of foreign currencies.

Arranging the complicated exchange and transfer of foreign funds in such transactions is but one of your bank's many services enabling Canadians to buy and sell abroad.
